SUMMARY

Computer Science Engineering student with an **8.7/10 CGPA** and hands-on experience building AI-powered and software applications. Interested in **AI application development, software engineering, Data Structures & Algorithms, and product building**. Experienced in developing practical solutions, participating in hackathons, and taking projects from problem identification through development and presentation.

EDUCATION

Ballari Institute of Technology and Management (BITM), Bellary
B.E. – Computer Science Engineering | Expected Graduation: 2028
CGPA: **8.7/10** | 12th Grade: **97% (2024)** | 10th Grade: **97% (2022)**

TECHNICAL SKILLS

Languages: Python, C, C++, Java, HTML, CSS
Core CS: Data Structures & Algorithms, OOP, Problem Solving
AI: Generative AI, AI Application Development, Basic Machine Learning
Databases: SQL
Tools: Git, GitHub
DSA: Arrays, Strings, Linked Lists, Stacks, Queues

PROJECTS

CampusPulse — AI-Powered Campus Presence & Security Intelligence Platform

React / Next.js | Node.js | PostgreSQL | Redis | WebSockets | JWT

- Developed a campus security platform integrating **QR verification, geofencing, digital gate passes, and real-time presence tracking**.
- Designed role-based workflows for **Students, Proctors, Mentors, Security, and Admins** with dedicated dashboards.
- Built a presence-state model covering **Inside, Grace Zone, Exit Pending, Outside, and Location Lost** states.
- Implemented security intelligence and privacy-focused workflows including **incident correlation, event replay, emergency mode, and escalation**.

Marathon Registration System | *Python*

- Developed a Python-based marathon registration system to manage participant registration and related details.
- Implemented structured data handling and user-friendly registration workflows.

ACHIEVEMENTS

- Hackathon Participant
- **Adobe University Hackathon 2026** — Participant
- **Xcelarate Hackathon** — Participant

CERTIFICATIONS

- Infosys Springboard Certifications
- Microsoft Certifications

AREAS OF INTEREST

Artificial Intelligence • Generative AI • Software Engineering • AI Product Development • Data Structures & Algorithms • Problem Solving • Product Building
