SUMMARY

Computer Science Engineering student with an **8.95/10 CGPA** and hands-on experience building AI-powered and software applications. Interested in **AI application development, software engineering, Data Structures & Algorithms, and product building**. Experienced in developing practical solutions, participating in hackathons, and taking projects from problem identification through development and presentation.

EDUCATION

Ballari Institute of Technology and Management (BITM), Bellary
B.E. – Computer Science Engineering | Expected Graduation: 2028
CGPA: **8.95/10** | 12th Grade: **91.5% (2024)** | 10th Grade: **96.96% (2022)**

TECHNICAL SKILLS

Languages: Python, C, C++, Java
Core CS: Data Structures & Algorithms, OOP, Problem Solving
AI: Generative AI, AI Application Development, Basic Machine Learning
Databases: SQL
Tools: Git, GitHub
DSA: Arrays, Strings, Linked Lists, Stacks, Queues

PROJECTS

CampusPulse — AI-Powered Campus Presence & Security Intelligence Platform

React / Next.js | *Node.js* | *PostgreSQL* | *JWT*

- Developed a campus security platform with QR verification, geofencing, digital gate passes, and real-time presence tracking.
- Designed role-based dashboards and security workflows for Students, Proctors, Mentors, Security, and Admins.

AI-Powered Smart Complaint Prioritization & Resolution Management System

Python | *OOP* | *SQLite* | *Priority Queue* | *Gemini API*

- Developed a complaint system for AI-based classification, prioritization, assignment, tracking, and resolution.
- Applied OOP, priority queues, FIFO queues, and undo stacks with role-based workflows and reporting.

ACHIEVEMENTS

Winner — Sophyra AI × BITM Future U AI Product Building Challenge

Hackathon Winner — 1× | **Hackathon Runner-Up** — 1×

CERTIFICATIONS

Infosys Springboard Certifications • Microsoft Certifications

AREAS OF INTEREST

Artificial Intelligence • Generative AI • Software Engineering • AI Product Development • Data Structures & Algorithms • Problem Solving • Product Building
